

Unified Network Information Service (UNIS)

Ahmed El-Hassany (Indiana University)

July 9, 2012

What is UNIS

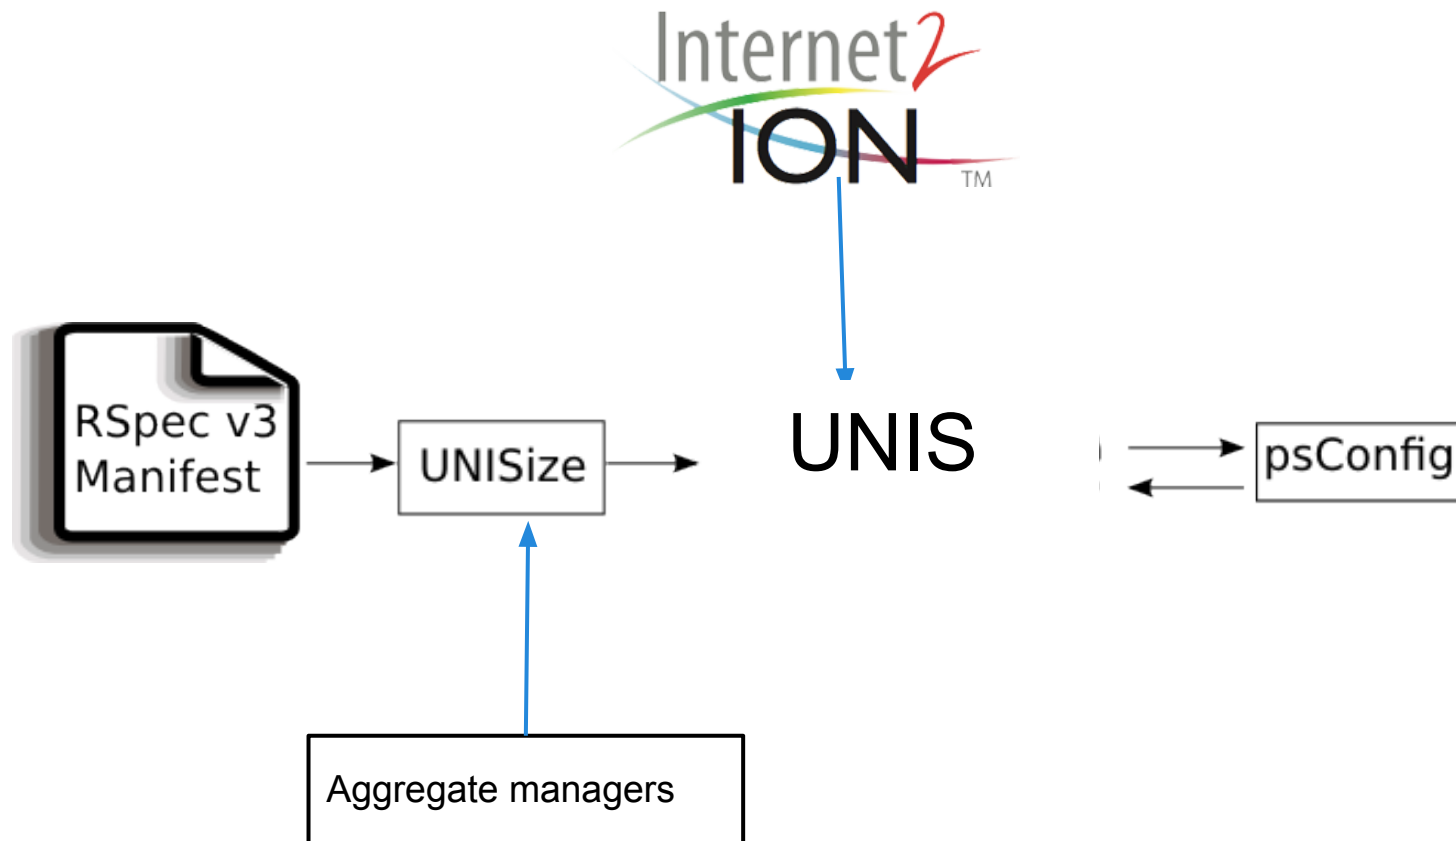

Topology Service + Lookup Service

plus:

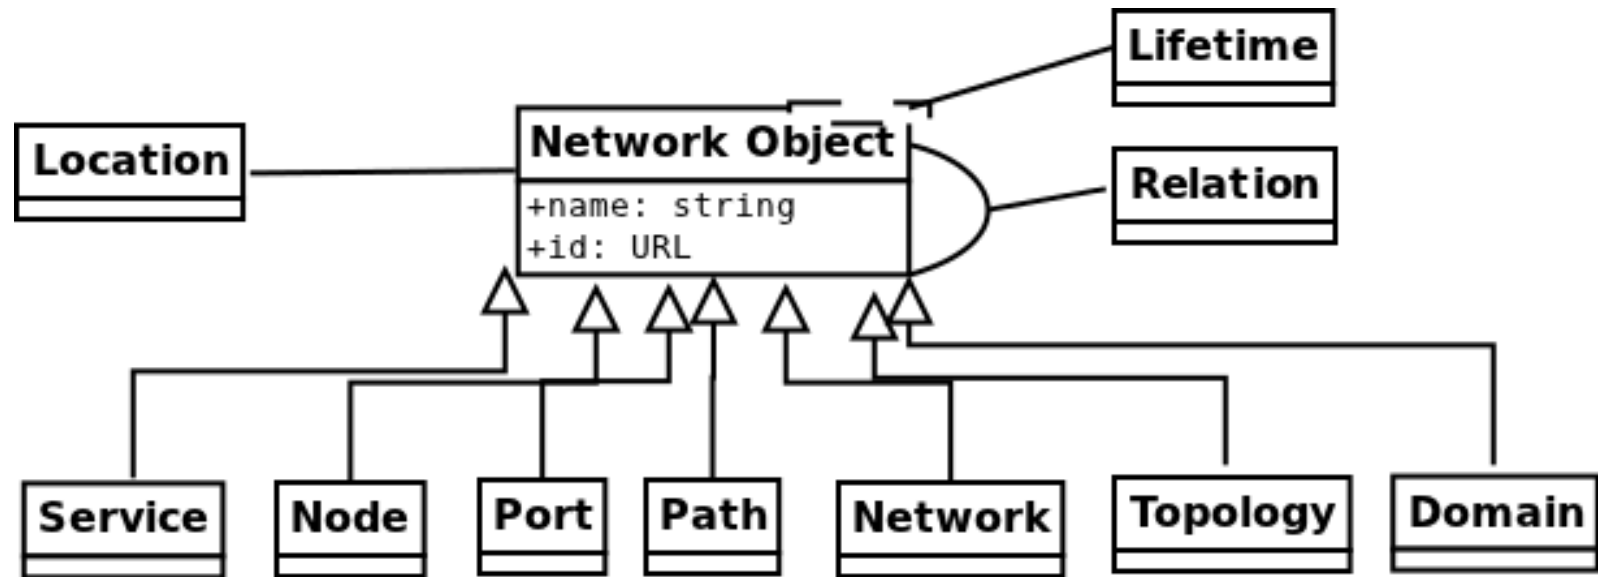

distributed configuration management

Metadata index

How UNIS Works

UNIS Object Model

And Metadata

UNIS is Extensible

- All UNIS models are extendable with user specific properties.

How it works

- REST API
 - HTTP GET, POST, PUT, and DELETE
- Hyperlinks to indicate relations between elements.
- Timestamp each change.

Where to go?

- Schemas are published at:
 - <http://unis.incntre.iu.edu/schema/20120709/>
