

- **Wimax**
 - **Networking**
 - **Fiber to lab switch from GENI rack**
 - AL2S link should be active, just have to work with CS to configure their switches and wimaxrf(s)/netspan
 - **Airspan**
 - Netspan – clients configured for old GENI vlan
 - Wimaxrf is configured, but not fully tested
 - » Note: It is a version dated 11/2013
 - **NEC**
 - Currently offline since the outage
 - Clients still default to old GENI vlan

- Discontinued
